Factory owning & Operating Experience

Presence in UK, Australia, Canada & Bangladesh

HOW IT WORKS

OUR SERVICES

Selection of Compliant Supplier: We help our Clients connect with the Right Suppliers and manage their relationships so that they enjoy increased levels of visibility and control over supply chain.

Production Control: We provide constant supervision and monitoring on the complex supply chain process especially during the production and ensure that our Clients receive their products within the agreed timeline (the Lead Time).

Quality Assurance: Quality is our top priority. With our experienced and skilled on-site Quality Control teams, we provide our Clients with transparency and controls needed to measure the quality of each order.

Creating safer & efficient supply chains: We combine our business intelligence with the collected real time critical data to build a complete picture of suppliers' operations and their exposure to risk.

Sample Support: Time is a crucial factor in this business and requires fast sample support from the Suppliers. We provide faster sample support to the Clients through our expansive Supplier network.

Research and Design Studio: The design and product development team offer proprietary designs to create wide ranges for the specific needs of our clients.

We provide all services required to be the extended arms, ears and eyes of our Clients.

OUR SUPPLIERS

Our suppliers are **handpicked** through a rigorous selection process which reflects our business ethics and values. We always carry out social and technical audits before choosing the **right partners** to create a longer lasting trusted business relationship.

Safe Workplaces: Suppliers must ensure that the workplace is safe from fire, electrical, chemical and any sort of hazardous threats.

Upholding Fundamental Rights: Suppliers should be able to safeguard against forced labor & child labor discrimination. They must also facilitate a formation of union.

Environmental Resilience: Suppliers should minimize impacts of chemicals, wastewater, air emission, waste and noise pollution.

Business Transparency: Suppliers should comply with the local laws applicable to the conduct of their business in their respective countries. Suppliers must also engage in ethical business practices.

We are passionate about working with suppliers who are using technologies to create products from materials that can be reused and recycled.
